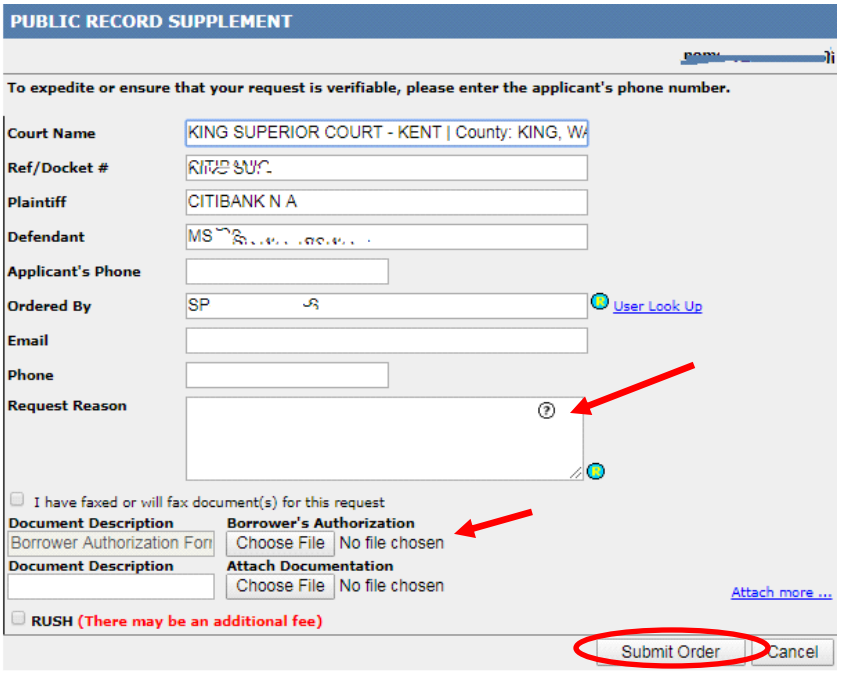
Ordering RiskView Liens & Judgments Supplements

RIskView Liens & Judgments displays the liens & judgments no longer included in the credit report. The source of the information is LexisNexis. RiskView Liens & Judgments display at the END of the credit report for clients that use RiskView Liens & Judgments as an addendum to credit. RiskView Liens & Judgments can also be requested as stand-alone reports.

To order a supplement on a finding in the RiskView Lien & Judgment report, click on the court name at the top of the filing:

The public record supplement screen will appear. Enter request instructions, upload supporting documentation and select Submit Order:

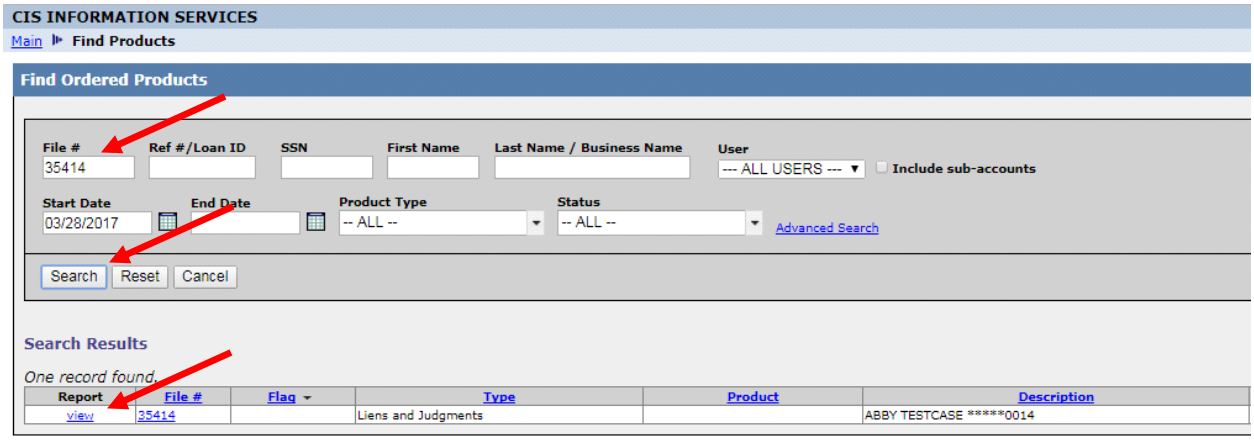


Accessing a Completed Supplement requested on RiskView Liens & Judgments:

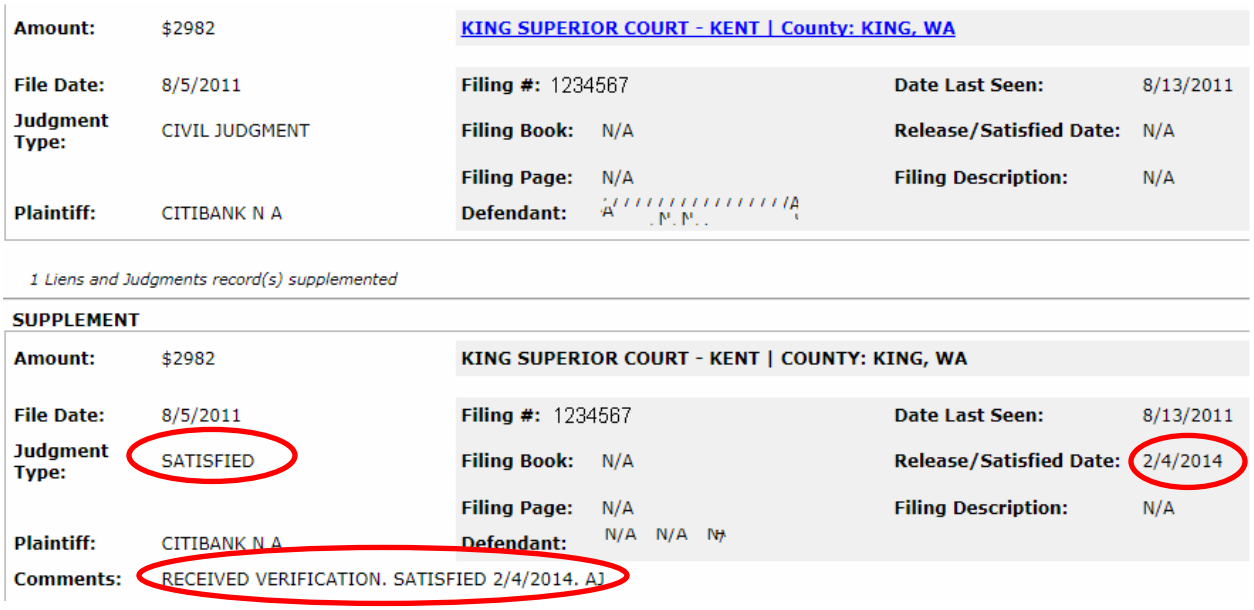
When the supplement request is completed, the client will receive email notification. The RiskView Liens & Judgments file number will appear in the subject line of the email. This file number is different than the credit report file number.

Log into the CIS platform and from the main screen. Select **Find Ordered Product**.

Enter the RiskView Liens & Judgments file number and select **Search**. Then select **View**:



The completed supplement will show **BELOW** the original filing in the RiskView Liens & Judgments report. In the example below, judgment type, release/satisfied date & comments have been updated:



Alternatively, to view the completed RiskView Liens & Judgments supplement, import the entire credit file into the Loan Origination System, using the credit report file number. The RiskView Liens & Judgments detail will appear at the end of report.
